# Multi Cool Lite 55

Multi-Temperature Bodies  
for Sweet City Distribution

Payload up to  
**1,200 kg**

**Zero-emission**  
refrigeration

**Self managed**  
cooling system

# One Eutectic Body

**Eutectic®**

## Multiple temperatures distribution

Multi Cool Lite by Eutectic Car is a multi-temperature body with frozen, chilled and ambient compartments. Multi Cool Lite allows to distribution a various of temperature-controlled products at the same time, frozen products, ice cream, dairy products, fruits and vegetables, beverages, etc.

Eutectic Car bodies are with zero-emission eutectic refrigeration and a 1,200 kg payload on a 3,500 kg vehicle is ideal for urban distribution and daily deliveries in street and home areas. Various compartment combinations are available as per customers' requirements.

### Standard Equipment

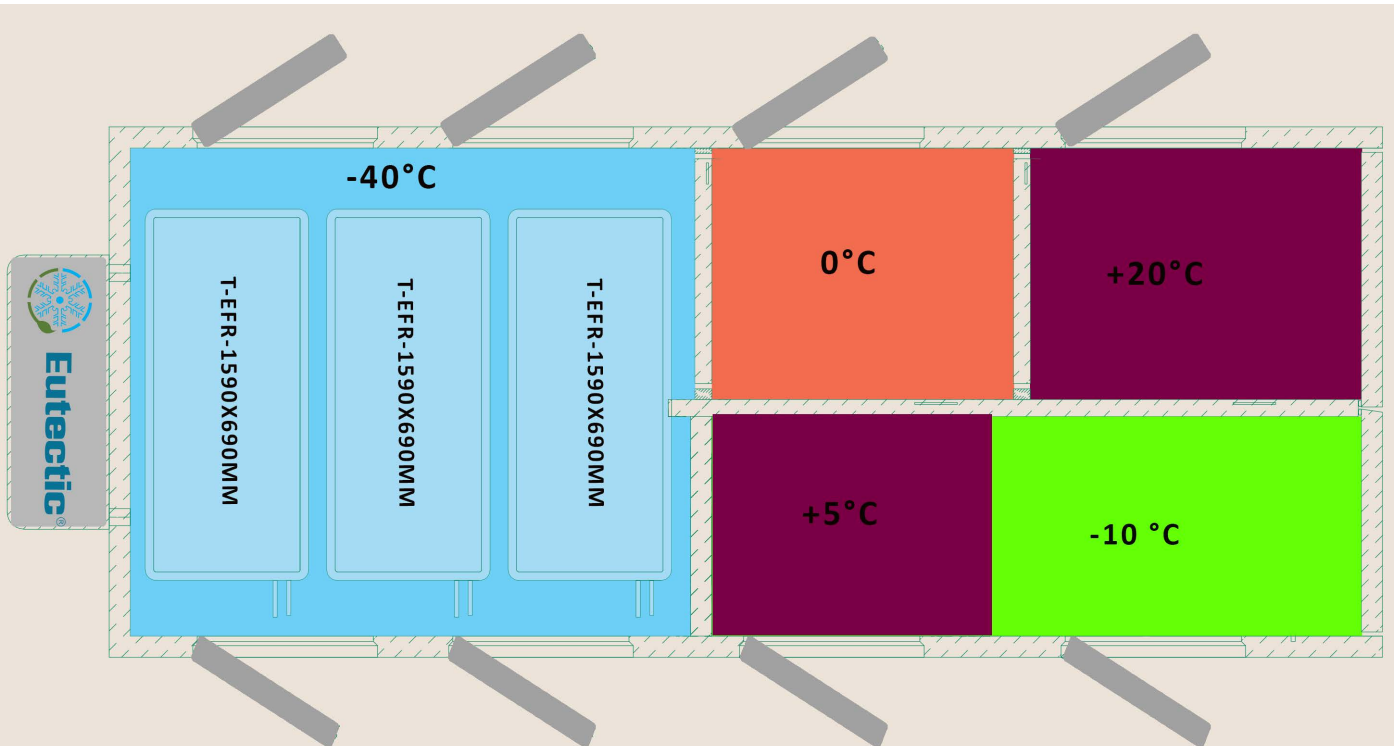

- Eutectic plates
- Cooling unit in front left compartment
- Locking system
- Shelves or Trolleys
- Interior LED lighting
- Tapered door frame to prevent ice formation
- Rubber door gaskets
- Door retainers
- Stainless steel handles
- Water channels above side doors

# Features & Benefits

## Multi-temperature solution

- Designed for urban distribution
- Three temperature zones in one vehicle
- Chilled compartments with adjustable temperatures (+5 °C / +20 °C)

## MULTI-TEMPERATURE BODIES

Multi-temperature bodies represent the perfect solution to meet the necessities of those requiring different temperatures within the same body.

With this option you can have a set-up with a low temperature compartment (-33° C) to transport ice cream and frozen food, one compartment with a positive temperature (+2° C / +4° C) for fresh food and a third compartment, isothermal, for dry foods and beverages. Eutectic plates and ventilated systems guarantee refrigeration and storage of different types of product.
